

Project Design Phase: Problem – Solution Fit Canvas

Date	24 June 2026
Project Name	Licensed Software Installation Requests via ServiceNow
Maximum Marks	2 Marks

Problem - Solution Fit Analysis

Canvas Section	Insight / Details
1. Customer Segment	Corporate employees requiring licensed software and departmental managers approving requests.
2. Jobs-to-be-done	Requesting specific software, obtaining manager approval, and ensuring IT installation.
3. Triggers	Project deadlines requiring specific tools, software license expiration, or new hire setup.
4. Emotions: Before/After	<i>Before:</i> Anxious/Frustrated due to slow manual processes. <i>After:</i> Confident/Relieved by automated, transparent status tracking.
5. Available Solutions	Manual email requests to IT, physical forms, or legacy ticketing systems with low visibility.

6. Customer Constraints	Strict adherence to company IT policies, limited budget for licenses, and mandatory approval workflows.
7. Behaviour	Employees currently send multiple follow-up emails to IT to check the status of their requests.
8. Channels of Behaviour	<i>Online:</i> Corporate intranet portal. <i>Offline:</i> Internal department meetings or helpdesk walkthroughs.
9. Problem Root Cause	Lack of centralized visibility in legacy request systems leading to bottlenecked communication between departments.
10. Your Solution	A centralized ServiceNow-based automated request system with real-time status tracking and automated approval routing.
