

Ideation Phase
Brainstorm & Idea Prioritization

Date	22 June 2026
Project Name	An employee requests installation of licensed software through the Service Catalog

Step-1: Select the Problem Statement

Identified Problems:

Manual processing of software installation requests causes delays. Lack of standardized approval workflow for licensed software. Difficulty in tracking request status and fulfillment. Manual communication between employees, managers, and IT support. Risk of software license non-compliance and poor audit visibility.

Selected Problem Statement :

Automate the software installation request process using ServiceNow to reduce manual effort, improve approval efficiency, ensure software license compliance, and provide end-to-end request tracking.

Step-2: Brainstorm, Idea Listing and Grouping

Idea	Description	Category
Service Catalog	Employees request software through a catalog item	User Interface
Approval Workflow	Route requests to manager or IT for approval	Workflow Automation
Business Rules	Automatically create incidents if licenses are unavailable	Automation
Catalog Tasks	Assign installation tasks to Software Support	Task Management
Email Notifications	Notify users about request status and approvals	Communication
Request Tracking	Track requests from submission to completion	Monitoring
Custom Request Table	Store additional software request information	Data Management

Step-3: Idea Prioritization

Idea	Business Value	Implementation Effort	Priority
Service Catalog Request	High	Medium	High
Approval Workflow	High	Medium	High
Catalog Task Creation	High	Low	High
Business Rules	Medium	Medium	Medium
Email Notifications	Medium	Low	Medium
Request Tracking	High	Medium	High
Reporting & Dashboard	Medium	High	Low

Final Selected Solution :

Develop a Software Installation Request Automation System in ServiceNow using the Service Catalog, Workflow, Business Rules, Approval Process, Catalog Tasks, Notifications, and Request Tracking. The solution will automate the complete lifecycle of software installation requests, improve operational efficiency, reduce processing time, and ensure compliance with software licensing policies.
